Resume :

Name : Pruthviraj Sanjay Kokare
Mobile: 9960213356
Email ID: pruthvirajkokare01@gmail.com
Portfolio: *https://pruthvirajkokare.github.io/portfolio-pruthviraj-kokare/*

Professional Experience:

Currently working as a **Devops Engineer** with **3 years** of experience in building and maintaining Business applications, Product Applications.

Summary:

- **3** years of experience In Cloud computing in IT Industry **DevOps & Linux, Git, GitHub, Maven, Jira Jenkins, Ansible, Docker, Kubernetes, AWS, Terraform.**
- Writing simple and complex **SQL** queries.
- Handson experience in **UI Debugging**.
- Experienced with SCM tool **GIT** along with **GitHub.**
- Experienced in Branching, tagging and version management strategies using **Git**.
- Experienced in build tools like **Maven.**
- Experience on continuous integration like **Jenkins.**
- Experienced on Jenkins by installing, configuring and maintaining for the purpose of Continuous integration (CI) and for End to End automation for all build and deployments.
- Good Experience on writing various scripts in Jenkins to monitor server health and self-heal if necessary. Also, configured email plug-in to send alerts based on groovy script.
- Experienced in implementing **Ansible** to manage all existing servers and automate the build/configuration of new servers and to setup Continuous Delivery Pipeline.
- Experienced in deploying micro services, including provisioning **AWS** environments using Ansible Playbooks.
- Experienced in Configuring and managing web Server and automating this using **Ansible**.
- Experienced in creating custom **Docker** Images using **Docker** file and creating **Docker** Volume and **Docker** Networking.
- Experienced with **Docker** on multiple cloud providers to build and containerize their application (CI/CD) to deploying either on public or private cloud.
- Good knowledge on **Kubernetes.**
- Experience on Docker orchestration and docker Docker containerization using **Kubernetes.**
- Good knowledge on **Apache - Tomcat server.**
- Have an ability to work on Multiple targets and can switch between different projects quickly as per requirement.
- Experience in configure AWS services like **VPC, EC2, Autoscaling, IAM, EBS, ELB, Cloud watch, RDS, R53, AWS Lambda and S3.**
- Managed servers on the AWS platform instances using **Terraform.**

Technical Experience:

Cloud Platform	AWS
Containerization Technology	Docker, Kubernetes.
Version Tools	GIT, GitHub.
CI/CD Tools	Jenkins, Ansible.
Operating Systems	Windows, Linux.
Build tool	Maven.
Skills	HTML, CSS, JS

Work Experience:

Project: 1

C-Edge Technologies Ltd.| Joint Venture Between TCS and SBI **Dec - 2024 To Present**

Project: Banking Applications

About Product:
Banking Applications are a suite of enterprise-grade digital platforms supporting core banking operations such as customer onboarding, account management, payments, loan processing, and transaction monitoring. These applications are designed to handle high-volume, real-time transactions with a strong focus on security, scalability, high availability, and regulatory compliance.

Client : **IDFC FIRST Bank**
Duration: From Dec 2024 to Present.
Team Size: 8
Environment: Git, Jenkins, Maven, Docker, Kubernetes, Terraform,
AWS (EC2, RDS, VPC, IAM, CloudWatch), Linux, SQL
Role: DevOps Engineer

Project Responsibilities:
• Responsible to provide highly efficient architecture to run the application with negligible down time using Git, Maven, Jenkins, Ansible, Docker, multiple ec2 instances with load balancers to manage load requirements Architecture also includes RDS, VPC and other services of AWS.
• Responsible to create branches in Git and merging branches as part of the Release management process.
• Responsible for Build and Release management using Git and Maven.
• Responsible for automating CI/CD.
• Responsible to write Docker files and Docker compose files to build docker images and containers.
• Responsible to maintain docker private repository.
• Used Kubernetes to orchestrate the deployment, scaling and management of docker containers.

Project: 2

Jowar India pvt ltd. **May - 2023 To Nov - 2024**

Project: Insurance Applications

Client: **Go Digit General Insurance**
Duration: May 2023 – Nov 2024
Role: DevOps Engineer
Team Size: 8

Environment: Git, Jenkins, Maven, Docker, Kubernetes, Terraform, AWS (EC2, RDS, VPC, IAM, CloudWatch), Linux, SQL

Project Description:

Enterprise-grade insurance platforms supporting policy management, claims processing, customer onboarding, and payment systems. Designed for high availability, scalability, and secure handling of real-time transactions in compliance with industry standards.

Key Responsibilities:

- Designed and implemented scalable and highly available infrastructure on AWS using EC2, RDS, VPC, and Load Balancers to ensure minimal downtime.
- Managed source code repositories using Git, including branching, merging, and release management.
- Automated CI/CD pipelines using Jenkins and Maven, reducing manual deployment efforts and improving release efficiency.
- Developed Docker files and Docker Compose configurations to containerize applications and standardize environments.
- Managed private Docker repositories for secure storage and version control of container images.
- Deployed and managed containerized applications using Kubernetes for orchestration, scaling, and high availability.
- Monitored applications and infrastructure using AWS CloudWatch to ensure performance and reliability.
- Collaborated with development and QA teams to streamline deployment processes and improve delivery timelines.

Personal Details:

Name	:	Pruthviraj Sanjay Kokare
Father name	:	Sanjay
Date of birth	:	04 May 2002
Gender	:	Male
Marital status	:	Unmarried
Languages	:	English, Hindi, Marathi

DECLARATION:

I hereby declare that the above furnished information is true and promise that I will work hard up to the satisfaction of my superiors and company if I am provided with the opportunity.

Place: Yours Truly,

Date: **Pruthviraj Kokare**
